Comments Provided by Anonymous Boater: These pictures were taken September 5, 2021 men's bathroom East Cove under Sun country Marine the hole under sink has been there for one year, urinals have been down for two months they just patched the wall up with some nice white tile, hopefully they will fix the rest... mold in the bathrooms really make them unusable, showers moldy dirty tiles falling off, cockroaches and other bugs the bathrooms all are a health risk and danger to say the least! This is the bathroom Sun Country Marines Customers use after looking at a 2-million-dollar vessel? lol great impressions of our wonderful Marina. This is the way they are spending our money and how it's really gone downhill since they have taken over. These people are bandits extorting monies from the slip renters. I think we all need to get together and file a class action lawsuit... maybe someone will listen maybe the people of Orange County paying taxes that go to the Parks Commission will listen to the abuse.
