ALERT TO BOATERS! MARINE CONSTRUCTION ACTIVITIES

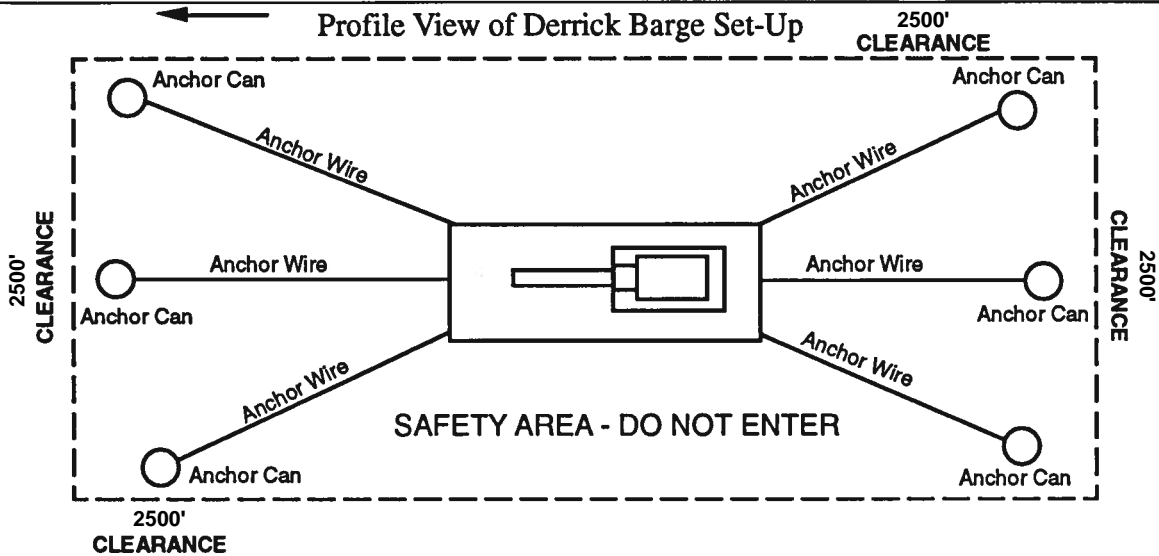

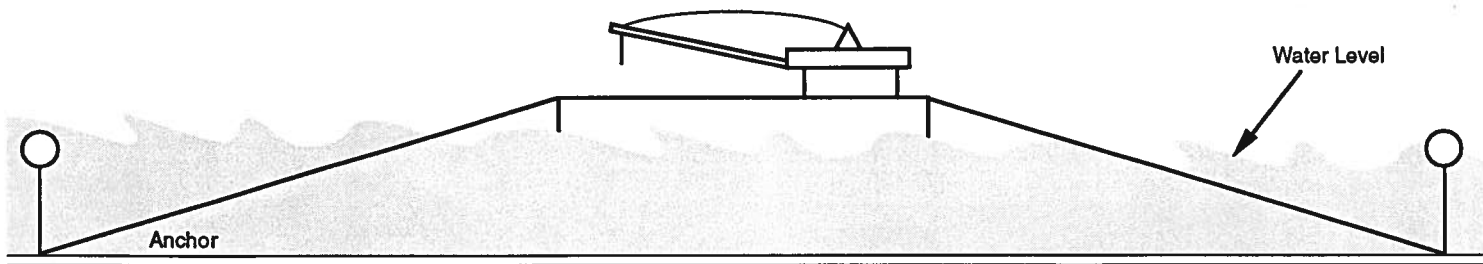

On or about July 5th, 2019 Connolly-Pacific Co. will be offshore of the San Clemente Pier performing rock placement and tug operations on the Wheeler North Reef. This phase of the project will run through until the end of September 2019.

The diagram below indicates the location that work will be conducted. Please avoid crossing areas where workboats, barges, and derrick barge are present, and be aware of offshore moorings.

The diagram on the reverse side shows the approximate configuration of anchor gear with relation to the derrick barge. When transiting the area, use caution and remain outside of the anchor spread, that is, always put the anchor buoys between your vessel and the derrick barge.

This project is listed in the **U.S. Coast Guard Local Notice to Mariners**, which provides call signs and radio frequencies for the derrick barge and tug boats working on this project. Thank you for your cooperation. **SCE POC/INFO?**

CAUTION:

Do not cross tow wire of tug & tow. Barges and boat are marked by towing shapes (Diamond). Consult...

"Rules of the Road" and "Local Notice To Mariners".
