JL Audio Announces Recall of Certain HD750/1 and MHD750/1 Amplifiers

Miramar, FL—December 3, 2010—JL Audio, manufacturer of home audio, mobile, and marine audio electronics is voluntarily recalling certain **HD750/1** and **MHD750/1** amplifiers shipped to authorized JL Audio dealers prior to December 2009. The company has decided that a defect related to motor vehicle or marine safety exists which, under rare circumstances, can result in a fire. Even though no injuries have been reported and there have only been a few incidents of damage, JL Audio values customer safety above all else and is offering to modify these amplifiers at no charge to correct the problem. JL Audio is working with the National Highway and Traffic Safety Administration (NHTSA) and the Office of Boating Safety on this recall.

Owners of affected product should discontinue its use immediately and take their vehicle/boat to an authorized JL Audio dealer. The dealer will unmount the amplifier, verify that it is included in this recall and send it in to JL Audio. Alternatively, U.S. consumers can follow the procedures outlined at www.jlaudiorecall.com to send the amplifier to JL Audio without dealer assistance. Dealers and consumers can also contact JL Audio's dedicated e-mail for this recall at recall@jlaudio.com, or call JL Audio toll-free at 1-888-JLAUDIO.

JL Audio will pay for shipping both ways and has increased staffing at its repair facility in Phoenix, Arizona. Depending on transit time, customers can expect a total turnaround time of 7-15 days. Repaired amplifiers will have a minimum of one year of warranty coverage from the date of the repair.

The company wants to stress that this recall only affects the models listed (HD750/1 autosound amplifier and MHD750/1 marine audio amplifier). No other JL Audio amplifier models are affected by this recall.

About [JL Audio](#)

Founded in 1975 in Miramar, Florida, JL Audio is a privately held American company manufacturing high-end audio solutions for home audio, mobile and marine electronics designs. JL Audio products are sold exclusively by specialty retailers throughout the U.S.A. and distributed in fifty-eight countries around the world. Recipient of numerous awards and accolades, JL Audio loudspeakers, amplifiers and subwoofers have been awarded fourteen U.S. patents for innovative audio technology.
